

## JAMSS Small Satellites Launch Services

Service Overview	<p>Japan Manned Space Systems Corporation (JAMSS) have been conducting the “Small Satellite Launch Services” with experiences of successful launches using paid opportunities provided by Japan Aerospace Exploration Agency (JAXA).</p> <p>We, JAMSS is the most experienced company in Japan, which provides small satellite launch services for foreign commercial and academic customers.</p> <p>Our primary service is supporting the small satellite deployment from International Space Station (ISS), which is the world most gentle launch method for small satellites. We provide total support from the contract to launch, including safety activities and interface coordination.</p> <p><b><u>JAMSS Totally Supports</u></b></p> <ul style="list-style-type: none"> <li>- Design Consultation</li> <li>- Safety Data Package</li> <li>- Safety Review</li> <li>- Schedule Arrange for Launch &amp; Deploy</li> </ul>	
Future	<ul style="list-style-type: none"> <li>· Small Satellite Deployment from ISS</li> <li>· Deployer: JEM Small Satellite Orbital Deployer (J-SSOD)</li> <li>· Moderate Launch Environment</li> <li>· Flexible for launch opportunities</li> </ul>	
Specification	Orbital Altitude:	380~420km
	Orbital Inclination:	51.6°
	Orbital Lifetime Approximately:	150~250days
	Size:	1U~3U, 55x55x35cm (1U = 10x10x10cm)
